LANGUAGE

Swedish

English

DRIVING LICENSE

Driving License B, access to own car

SKILLS

C#, .NET, ASP .NET Core

SQL Server

HTML & CSS / Tailwind CSS

JavaScript

React / React Native

TypeScript

Node.js / express

Git / Terminalen

PROGRAMS

Visual Studio & Code

Postman / Insomnia

Figma

Adobe PS / AI / ID

OTHER SKILLS

API development, testing, UX/UI,
Agile methods - Scrum

PROFILE

I am a creative and resourceful web developer with a curiosity for learning and exploring new technologies. I maintain a strong focus on quality and continuously seek ways to enhance my skills. I'm also passionate about using color, form, and user-friendliness to create positive user experiences, including API integrations.

WORKING EXPERIENCE

Brutal Beats

2024/03 - 2025/03

Webdevelopment - fullstack

Side project - Website for booking management

Technologies: React, TypeScript, Tailwindcss, Node.js

Prodigies

2024/01 - 2024/08

App development - fullstack

Side project - App for student to find the perfect education

Technologies: React Native, TypeScript, SQLite, Firebase

Slowfashion

2023/11 - 2024/05

Backend App Development

Side project - App for shopping brands

Technologies: ASP.Net Core web api and C#

Omegapoint

2023/09 - 2024/12

Frontend development

LIA - build a PIM-system

Technologies: React, TypeScript, React Query, Axios, figma

Printagon Graphics

2013/02 - ongoing

Printing/Bookbinding/Warehouse, System Integration

Machine operator in bookbinding, assistant in printing, warehouse

Side project - Building an inventory management system with Blazor.

Technologies: C#, ASP.NET, React, TypeScript, Material UI

EDUCATION

Frontend development

2022/09 - 2024/05

2-year Vocational Education in Frontend

Medieinstitutet, Malmö

Web Development within .NET

2020/08 - 2022/06

2-year Vocational Education in Backend / Full Stack

EC Utbildning, Helsingborg

Graphic Design

2005/08 - 2006/06

Graphic Technique, Design Language and Composition,
Illustration

Fridhems Folkhögskola, Svalöv

Web Design

2004/08 - 2005/06

Website design with Macromedia Dreamweaver

Fridhems Folkhögskola, Svalöv

Hello there,

After four years of dedicated study and hands-on experience in both frontend and backend development, I am now eager to transition into the professional world as a junior developer—ready to contribute, learn, and grow.

Driven by a strong passion for both personal and professional development, I have completed a comprehensive education in frontend development, including courses in JavaScript, API development with Node.js, and database management using both SQL and NoSQL.

Currently, I'm gaining practical experience through an internship, where I'm developing a mobile app for high school students using React Native and TypeScript.

I also hold a two-year vocational degree in C# and .NET with a focus on data management, providing me with a solid foundation in backend development. I've continued to build on this through real-world projects and ongoing self-driven learning.

One of my current projects involves building a custom website for a printing company. This has deepened my backend skills—especially in SQL Server—as I work to support and optimize their internal processes.

On the creative side, I also take on graphic design assignments. At the moment, I'm collaborating with a theatre group to create posters and a program booklet for an upcoming production later this year.

Thank you for taking the time to review my application. I would be delighted to discuss how my skills and background could support your team.

Feel free to explore my portfolio to learn more about me and see some of my work.

Kind regards,
Sofia Travnicek Mattiasson

Learning Objectives 2025

I strive to broaden my technical skills in the following areas:

C# and ASP.NET: Developing scalable backend solutions.

React: Creating dynamic and responsive user interfaces.

SQL: Improving my knowledge in database management and efficient data analysis.

Azure: Understanding how to build and manage cloud applications.

Docker: Streamlining development and deployment through containerization.

WordPress/Umbraco: Using and customizing CMS for website content.
